What this product consists of

Type: Equities IXIOS ENERGY METALS I - USD of the Undertaking for Collective Investment in Transferable Securities (UCITS) Ixios Energy Metals Sub-Fund of the Ixios Funds Lux SICAV.

Duration: The Fund is open-ended. The management company may dissolve the fund by liquidation or merger with another fund in the best interests of investors and in accordance with the Prospectus.

Objectives: IXIOS ENERGY METALS is a sub-fund seeking long-term performance through exposure to the equities of companies producing and mining non-precious metals. The objective of the sub-fund is to outperform the MSCI ACWI Select Metals & Mining Producers ex Gold & Silver IMI (net dividends reinvested) over a 5-year investment period, after taking into account ongoing costs, by investing at least 90% in stocks selected on the basis of extra-financial criteria using a proprietary rating methodology by taking into account environmental, social and governance ("ESG") aspects aimed at creating sustainable value.

The UCI is classified as Article 8 within the meaning of Regulation (EU) 2019/2088 on the publication of sustainability information in the financial services sector (known as the Disclosure Regulation).

Benchmark index MSCI ACWI Select Metals & Mining Producers ex Gold & Silver IMI (M1WDS1PI), denominated in USD. This index, published by MSCI, is calculated with net dividends reinvested.

The Benchmark Indicator does not define the Fund's investment universe restrictively but enables investors to assess the risk profile they can expect when investing in the Fund.

Investment strategy: the Sub-Fund's investment strategy aims to build a portfolio concentrated in shares of companies producing and mining non-precious metals.

IXIOS Energy Metals is managed through rigorous stock picking, based on an investment process that includes qualitative criteria, internal and external analysis, and direct contact with the companies in which the fund invests.

The investment universe is essentially made up of equities of companies domiciled in Australia, Canada, the United States and the United Kingdom. However, the fund reserves the right to select securities from emerging countries or equities with a market capitalisation of less than USD 50 million, up to a limit of 10%.

The sub-fund invests at least 60% of its net assets in equities. Up to 100% of the equity portfolio may be denominated in currencies other than the Fund's reference currency, the US dollar. This risk will not be systematically hedged. This will result in a maximum exposure to currency risk equivalent to 100% of the equity portfolio.

The sub-fund may invest up to 20% of its net assets in Money Market Instruments, mainly for liquidity management purposes. These are instruments with a maturity of less than twelve months issued by governments in US dollars (e.g. T-Bills) of the high-grade type or higher (minimum short-term rating equivalent to A-1 on the Standard & Poor's rating scale/ P-1 for Moody's or F1 for Fitch Ratings or a rating deemed equivalent by the management company).

The sub-fund may invest in financial contracts traded on international markets, up to a limit of one time the sub-fund's net assets, in order to enter into: options on individual equities listed on regulated markets for exposure purposes; or forward exchange contracts (over the counter or standardised) or currency swaps in order to hedge exposure to certain currencies.

The Fund may also hold embedded derivatives (warrants or certificates) on an ancillary basis, for example in the case of a capital increase in a company with warrants attached.

The Sub-Fund may also invest up to 10% of its net assets in money market UCIs.

The Sub-Fund may hold up to 10% of its net assets in term deposits with the Custodian.

The sub-fund is an accumulation fund.

Target retail investors: This product is aimed at professional investors who have advanced knowledge and significant experience of investing in funds, who aim to increase the value of their investment over the recommended holding period and who are prepared to assume a high level of risk on their initial capital.

Redemption and transaction: Investors may obtain redemption on any business day upon simple request. Subscription and redemption requests are centralised each trading day before 6pm with our centralising agent Société Générale and executed based on the next net asset value dated the following day.

Custodian: Société Générale Luxembourg- 11, avenue Emile Reuter, L-2420 Luxembourg

Practical information: Further information on this Fund, including the prospectus and financial reports, may be obtained free of charge on request from Ixios Asset Management - 8, rue d'Aboukir, 75002 Paris, France.

The net asset value of the Funds is available at www.ixios-am.com.

What are the risks and what's in it for me?

Risk indicator:

The synthetic risk indicator shows the level of risk of this product compared with others. It indicates the probability that this product will incur losses in the event of market movements or if we are unable to pay you.

Beware of exchange rate risk. If the currency of your account is different from that of this Share, the amounts paid to you will depend on the exchange rate between the currencies. This currency risk is not considered in the above indicator.

We have classified this product in risk class 6 out of 7, which is a "medium-high risk class".

In other words, the potential losses linked to the future results of the product are at a "high" level and, if the situation were to deteriorate on the markets, it is very likely that our ability to pay you would be affected.

Other materially relevant risks not included in the synthetic risk indicator: Market liquidity risk may accentuate variations in product performance.

As this product does not provide protection against the vagaries of the market, you could lose all or part of your investment.

In addition to the risks included in the risk indicator, other risks may influence the Fund's performance. Please refer to the fund prospectus.

Performance scenarios

The unfavourable, intermediate, and favourable scenarios presented represent examples using the best and worst performances, as well as the average performance of the product, possibly supplemented by that of the reference indicator over the last ten years. Markets could evolve very differently in the future. The stress scenario shows what you could achieve in extreme market situations.

What you get out of this product depends on future market performance. Future market movements are unpredictable and cannot be accurately predicted.

Favourable scenario	What you could get after deduction of costs Average annual yield	26 810 USD 168,11 %	32 020 USD 26,21 %

The chiffres shown include all costs of the product itself, but not necessarily all charges due to your adviser or distributor. These chiffres do not consider your personal fiscale situation, which may also influence the amounts you receive.

What happens if Ixios Asset Management is unable to make the payments?

The product is a co-ownership of financial instruments and deposits that is separate from the portfolio management company. In the event of default by the portfolio management company, the assets of the product held by the custodian will not be affected. In the event of default by the custodian, the risk of financial loss to the product is mitigated by the legal segregation of the custodian's assets from those of the product.

What will this investment cost me?

The person selling or advising you on this product may ask you to pay additional costs. If so, they will tell you about these costs and show you how they affect your investment.

Costs over time

The tables show the amounts deducted from your investment to cover the different types of costs. These amounts depend on the amount you invest and the length of time you hold the product. The amounts shown here are illustrations based on an example of an investment amount and different possible investment periods.

We have assumed:

- that in the first year you would get back the amount you invested (0% annual return). That for the other holding periods, the product evolves as indicated in the intermediate scenario.
- 10 000 USD are invested.

Recommended holding period: 5 years	If you leave after 1 year	If you leave after 5 years (recommended holding period)

What are the risks and what's in it for me?

Risk indicator:

The synthetic risk indicator shows the level of risk of this product compared with others. It indicates the probability that this product will incur losses in the event of market movements or if we are unable to pay you.

Beware of exchange rate risk. If the currency of your account is different from that of this Share, the amounts paid to you will depend on the exchange rate between the currencies. This currency risk is not considered in the above indicator.

We have classified this product in risk class 5 out of 7, which is a "medium-high risk class".

In other words, the potential losses linked to the future results of the product are at a "high" level and, if the situation were to deteriorate on the markets, it is very likely that our ability to pay you would be affected.

Other materially relevant risks not included in the synthetic risk indicator: Market liquidity risk may accentuate variations in product performance.

As this product does not provide protection against the vagaries of the market, you could lose all or part of your investment.

In addition to the risks included in the risk indicator, other risks may influence the Fund's performance. Please refer to the fund prospectus.

Performance scenarios

The unfavourable, intermediate, and favourable scenarios presented represent examples using the best and worst performances, as well as the average performance of the product, possibly supplemented by that of the reference indicator over the last ten years. Markets could evolve very differently in the future. The stress scenario shows what you could achieve in extreme market situations.

What you get out of this product depends on future market performance. Future market movements are unpredictable and cannot be accurately predicted.

Favourable scenario	What you could get after deduction of costs Average annual yield	24 030 CHF 140,28 %	26 970 CHF 21,95 %

The chifffes shown include all costs of the product itself, but not necessarily all charges due to your adviser or distributor. These chifffes do not consider your personal fiscale situation, which may also influence the amounts you receive.

What happens if Ixios Asset Management is unable to make the payments?

The product is a co-ownership of financial instruments and deposits that is separate from the portfolio management company. In the event of default by the portfolio management company, the assets of the product held by the custodian will not be affected. In the event of default by the custodian, the risk of financial loss to the product is mitigated by the legal segregation of the custodian's assets from those of the product.

What will this investment cost me?

The person selling or advising you on this product may ask you to pay additional costs. If so, they will tell you about these costs and show you how they affect your investment.

Costs over time

The tables show the amounts deducted from your investment to cover the different types of costs. These amounts depend on the amount you invest and the length of time you hold the product. The amounts shown here are illustrations based on an example of an investment amount and different possible investment periods.

We have assumed:

- that in the first year you would get back the amount you invested (0% annual return). That for the other holding periods, the product evolves as indicated in the intermediate scenario.
- 10 000 CHF are invested.

What this product consists of

Type: Equities IXIOS ENERGY METALS S - USD of the Undertaking for Collective Investment in Transferable Securities (UCITS) Ixios Energy Metals Sub-Fund of the Ixios Funds Lux SICAV.

Duration: The Fund is open-ended. The management company may dissolve the fund by liquidation or merger with another fund in the best interests of investors and in accordance with the Prospectus.

Objectives: IXIOS ENERGY METALS is a sub-fund seeking long-term performance through exposure to the equities of companies producing and mining non-precious metals. The objective of the sub-fund is to outperform the MSCI ACWI Select Metals & Mining Producers ex Gold & Silver IMI (net dividends reinvested) over a 5-year investment period, after taking into account ongoing costs, by investing at least 90% in stocks selected on the basis of extra-financial criteria using a proprietary rating methodology by taking into account environmental, social and governance ("ESG") aspects aimed at creating sustainable value.

The UCI is classified as Article 8 within the meaning of Regulation (EU) 2019/2088 on the publication of sustainability information in the financial services sector (known as the Disclosure Regulation).

Benchmark index MSCI ACWI Select Metals & Mining Producers ex Gold & Silver IMI (M1WDS1PI), denominated in USD. This index, published by MSCI, is calculated with net dividends reinvested.

The Benchmark Indicator does not define the Fund's investment universe restrictively but enables investors to assess the risk profile they can expect when investing in the Fund.

Investment strategy: the Sub-Fund's investment strategy aims to build a portfolio concentrated in shares of companies producing and mining non-precious metals.

IXIOS Energy Metals is managed through rigorous stock picking, based on an investment process that includes qualitative criteria, internal and external analysis, and direct contact with the companies in which the fund invests.

The investment universe is essentially made up of equities of companies domiciled in Australia, Canada, the United States and the United Kingdom. However, the fund reserves the right to select securities from emerging countries or equities with a market capitalisation of less than USD 50 million, up to a limit of 10%.

The sub-fund invests at least 60% of its net assets in equities. Up to 100% of the equity portfolio may be denominated in currencies other than the Fund's reference currency, the US dollar. This risk will not be systematically hedged. This will result in a maximum exposure to currency risk equivalent to 100% of the equity portfolio.

The sub-fund may invest up to 20% of its net assets in Money Market Instruments, mainly for liquidity management purposes. These are instruments with a maturity of less than twelve months issued by governments in US dollars (e.g. T-Bills) of the high-grade type or higher (minimum short-term rating equivalent to A-1 on the Standard & Poor's rating scale/ P-1 for Moody's or F1 for Fitch Ratings or a rating deemed equivalent by the management company).

The sub-fund may invest in financial contracts traded on international markets, up to a limit of one time the sub-fund's net assets, in order to enter into: options on individual equities listed on regulated markets for exposure purposes; or forward exchange contracts (over the counter or standardised) or currency swaps in order to hedge exposure to certain currencies.

The Fund may also hold embedded derivatives (warrants or certificates) on an ancillary basis, for example in the case of a capital increase in a company with warrants attached.

The Sub-Fund may also invest up to 10% of its net assets in money market UCIs.

The Sub-Fund may hold up to 10% of its net assets in term deposits with the Custodian.

The sub-fund is an accumulation fund.

Target retail investors: This product is aimed at professional investors who have advanced knowledge and significant experience of investing in funds, who aim to increase the value of their investment over the recommended holding period and who are prepared to assume a high level of risk on their initial capital.

Redemption and transaction: Investors may obtain redemption on any business day upon simple request. Subscription and redemption requests are centralised each trading day before 6pm with our centralising agent Société Générale and executed based on the next net asset value dated the following day.

Custodian: Société Générale Luxembourg- 11, avenue Emile Reuter, L-2420 Luxembourg

Practical information: Further information on this Fund, including the prospectus and financial reports, may be obtained free of charge on request from Ixios Asset Management - 8, rue d'Aboukir, 75002 Paris, France.

What this product consists of

Type: Equities IXIOS ENERGY METALS P - EUR of the Undertaking for Collective Investment in Transferable Securities (UCITS) Ixios Energy Metals Sub-Fund of the Ixios Funds Lux SICAV.

Duration: The Fund is open-ended. The management company may dissolve the fund by liquidation or merger with another fund in the best interests of investors and in accordance with the Prospectus.

Objectives: IXIOS ENERGY METALS is a sub-fund seeking long-term performance through exposure to the equities of companies producing and mining non-precious metals. The objective of the sub-fund is to outperform the MSCI ACWI Select Metals & Mining Producers ex Gold & Silver IMI (net dividends reinvested) over a 5-year investment period, after taking into account ongoing costs, by investing at least 90% in stocks selected on the basis of extra-financial criteria using a proprietary rating methodology by taking into account environmental, social and governance ("ESG") aspects aimed at creating sustainable value.

The UCI is classified as Article 8 within the meaning of Regulation (EU) 2019/2088 on the publication of sustainability information in the financial services sector (known as the Disclosure Regulation).

Benchmark index MSCI ACWI Select Metals & Mining Producers ex Gold & Silver IMI (M1WDS1PI), converted in EUR. This index, published by MSCI, is calculated with net dividends reinvested.

The Benchmark Indicator does not define the Fund's investment universe restrictively but enables investors to assess the risk profile they can expect when investing in the Fund.

Investment strategy: the Sub-Fund's investment strategy aims to build a portfolio concentrated in shares of companies producing and mining non-precious metals.

IXIOS Energy Metals is managed through rigorous stock picking, based on an investment process that includes qualitative criteria, internal and external analysis, and direct contact with the companies in which the fund invests.

The investment universe is essentially made up of equities of companies domiciled in Australia, Canada, the United States and the United Kingdom. However, the fund reserves the right to select securities from emerging countries or equities with a market capitalisation of less than USD 50 million, up to a limit of 10%.

The sub-fund invests at least 60% of its net assets in equities. Up to 100% of the equity portfolio may be denominated in currencies other than the Fund's reference currency, the US dollar. This risk will not be systematically hedged. This will result in a maximum exposure to currency risk equivalent to 100% of the equity portfolio.

The sub-fund may invest up to 20% of its net assets in Money Market Instruments, mainly for liquidity management purposes. These are instruments with a maturity of less than twelve months issued by governments in US dollars (e.g. T-Bills) of the high-grade type or higher (minimum short-term rating equivalent to A-1 on the Standard & Poor's rating scale/ P-1 for Moody's or F1 for Fitch Ratings or a rating deemed equivalent by the management company).

The sub-fund may invest in financial contracts traded on international markets, up to a limit of one time the sub-fund's net assets, in order to enter into: options on individual equities listed on regulated markets for exposure purposes; or forward exchange contracts (over the counter or standardised) or currency swaps in order to hedge exposure to certain currencies.

The Fund may also hold embedded derivatives (warrants or certificates) on an ancillary basis, for example in the case of a capital increase in a company with warrants attached.

The Sub-Fund may also invest up to 10% of its net assets in money market UCIs.

The Sub-Fund may hold up to 10% of its net assets in term deposits with the Custodian.

The sub-fund is an accumulation fund.

Target retail investors: This product is aimed at professional investors who have advanced knowledge and significant experience of investing in funds, who aim to increase the value of their investment over the recommended holding period and who are prepared to assume a high level of risk on their initial capital.

Redemption and transaction: Investors may obtain redemption on any business day upon simple request. Subscription and redemption requests are centralised each trading day before 6pm with our centralising agent Société Générale and executed based on the next net asset value dated the following day.

Custodian: Société Générale Luxembourg- 11, avenue Emile Reuter, L-2420 Luxembourg

Practical information: Further information on this Fund, including the prospectus and financial reports, may be obtained free of charge on request from Ixios Asset Management - 8, rue d'Aboukir, 75002 Paris, France.

The net asset value of the Funds is available at www.ixios-am.com.

What are the risks and what's in it for me?

Risk indicator:

The synthetic risk indicator shows the level of risk of this product compared with others. It indicates the probability that this product will incur losses in the event of market movements or if we are unable to pay you.

Beware of exchange rate risk. If the currency of your account is different from that of this Share, the amounts paid to you will depend on the exchange rate between the currencies. This currency risk is not considered in the above indicator.

We have classified this product in risk class 5 out of 7, which is a "medium-high risk class".

In other words, the potential losses linked to the future results of the product are at a "high" level and, if the situation were to deteriorate on the markets, it is very likely that our ability to pay you would be affected.

Other materially relevant risks not included in the synthetic risk indicator: Market liquidity risk may accentuate variations in product performance.

As this product does not provide protection against the vagaries of the market, you could lose all or part of your investment.

In addition to the risks included in the risk indicator, other risks may influence the Fund's performance. Please refer to the fund prospectus.

Performance scenarios

The unfavourable, intermediate, and favourable scenarios presented represent examples using the best and worst performances, as well as the average performance of the product, possibly supplemented by that of the reference indicator over the last ten years. Markets could evolve very differently in the future. The stress scenario shows what you could achieve in extreme market situations.

What you get out of this product depends on future market performance. Future market movements are unpredictable and cannot be accurately predicted.

Favourable scenario	What you could get after deduction of costs Average annual yield	24 360 EUR 143,57 %	31 860 EUR 26,08 %

The chiffres shown include all costs of the product itself, but not necessarily all charges due to your adviser or distributor. These chiffres do not consider your personal fiscale situation, which may also influence the amounts you receive.

What happens if Ixios Asset Management is unable to make the payments?

The product is a co-ownership of financial instruments and deposits that is separate from the portfolio management company. In the event of default by the portfolio management company, the assets of the product held by the custodian will not be affected. In the event of default by the custodian, the risk of financial loss to the product is mitigated by the legal segregation of the custodian's assets from those of the product.

What will this investment cost me?

The person selling or advising you on this product may ask you to pay additional costs. If so, they will tell you about these costs and show you how they affect your investment.

Costs over time

The tables show the amounts deducted from your investment to cover the different types of costs. These amounts depend on the amount you invest and the length of time you hold the product. The amounts shown here are illustrations based on an example of an investment amount and different possible investment periods.

We have assumed:

- that in the first year you would get back the amount you invested (0% annual return). That for the other holding periods, the product evolves as indicated in the intermediate scenario.
- 10 000 EUR are invested.
